- The former firm Cerny at Nove Mesto nad Vahom (Ph9/T36) was nationalized in 1948 and was placed under the management of Kovosmalt Trnava (P49/T22). The plant employs 350 workers and is the most modern factory in the CSR for the production of tin cans (caus made of sheet steel lined with tin). After the war four machines were purchased from England (Bliss) at a cost of four million crowns. The plant's present capacity of approximately 60,000 cans per shift cannot be used fully because of a shortage of thin steel sheeting. The factory buildings are made of concrete and the plant occupies 4,000 square neters in the center of Nove Mesto.
- 2. The former firm Reiss located in Nove Mesto is also under the management of Kovosmalt Trnava. Employing 280 workers, the plant produces pitchforks, shovels, welded chains and wrought iron nails. Despite the fact that the buildings are on the point of collapse, production is economical and satisfactory.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
